## INTERLOCKING LOG CABINS

The pine straight forward design and upper rooms adds dimension to the size of the living accommodation downstairs and gives more alternative for bedrooms or alternative rooms that require a view point for that perfect view.

**Pine** (living area 116 m<sup>2</sup> and built area 99 m<sup>2</sup>)

This cabin has two rooms upstairs ideal for a large bedroom and en suite. The entry area to this cabin has been slightly withdrawn to allow for an overbuilt entrance area.
