## INTERLOCKING LOG CABINS

### Silver Birch

The silver birch design is a compact model, but contain all the rooms required to be an efficient holiday cabin for short term let. The interior solutions can be changed to accommodate more luxurious double bedrooms with en-suite bathroom and sauna. However this is a good example of a simple design and our collection shows how flexible Log Cabins can be.

### **Silver birch 1** (living area 49 m<sup>2</sup> and built area 50.7 m<sup>2</sup>)

Compact but still surprisingly spacious, It contains living room , kitchen, 2 bedrooms, bathroom and overbuilt entry porch. The smallest bedroom has room for a bunk-bed for two children. The luxury variation converts the smallest bedroom to an en-suite bathroom and the bathroom to a sauna.
